ESSENTIAL INFORMATION

BOLTS

Bolts are the currency of the universe – which might come in handy if you have to bribe any untrustworthy individuals. Enemies always carry a few, but you can also find them by smashing open crates and other objects that you might see lurking in the darkness.

CRATES

Use Ratchet's trusty Omniwrench Millennium 12 to smash open crates and grab the contents. Sometimes you'll find bolts inside crates, and sometimes you'll find ammo.

NANOHEALTH ORBS

Look out for glowing green or blue orbs in crates. These orbs contain nanobots that can be used to top up Ratchet's health.

GADGETS!

Ratchet is a whizz with gadgets – and it's a good job too because there are plenty to pick up on this adventure. As the quest begins, you'll find he already has a lot of special gadgets in his inventory, and you'll get a chance to experiment with them for a while... before they're lost and Ratchet has to find some of them again!

OMNIWRENCH MILLENNIUM 12

A versatile tool, the Omniwrench Millennium 12 can be useful in almost any circumstance. Firstly, you can use it as a wrench – just press the ▣ button and ⬅ or ➡ to operate machinery. The Omniwrench Millennium 12 also doubles as a weapon – just press the ▣ button to whack any passing enemies. To activate the Comet Strike feature, press the R2 button and the ▣ button at the same time to throw the Omniwrench Millennium 12 and keep your enemies at a distance.

As the Omniwrench Millennium 12 is also magnetically charged, it can pick up any loose bolts that are lying around. Handy, eh?

KINETIC TETHER

A new upgrade to the Omniwrench is the kinetic tether. Use this to electrify and manipulate certain objects. If you see a wrench icon hovering over a target:

- press and hold the R2 button
- then press the ▣ button to activate the tether
- use the right stick to manipulate the object (draw it closer, turn it around)
- move the left stick to move Ratchet as necessary.

Press the ▣ button again to release the tether.

GRINDBOOTS

Use the Grindboots to ride rails and access hard-to-reach areas. Press the ⊗ button to jump over obstacles or press the ⊗ button and ⬅ or ➡ at the same time to hop over to another rail.

GRAVITY BOOTS

Ratchet's Gravity Boots have powerful magnets in the soles that allow him to run up metal walls and panels – a great advantage to outwit enemies!

SWINGSHOT

This very useful mechanical glove can be used to harness high-up targets in order to swing to safety. Jump towards the target and quickly press the ◉ button to activate the Swingshot. Once it has attached itself to the target, use the left stick to swing towards a safe place and then release the ◉ button to leap.

WEAPONS

Each weapon in Ratchet's armoury has a special feature that makes it handy in certain circumstances. Some can take on many targets at once, while others are good for taking down bigger adversaries. Some weapons can also be upgraded to pack a bigger punch. Check your inventory for tips on how to get the most out of your weapons – and remember... space pirates on the hunt for space booty will stop at nothing to get what they want!
